

EXPANDED OFFERING

INSTALL FIRE PROTECTION SYSTEMS FASTER

A complete fire-system connection solution from riser to head

ASC SPF Anvil® Grooved Fittings, Reliable® FlexHead® Sprinkler Drops and Components, and Afcon® Seismic Bracing

Ferguson brings together ASC's SPF Anvil grooved lineup, FlexHead fully-welded flexible sprinkler drops, and Reliable fire protection components to give contractors a complete, code-ready system solution engineered for speed, safety, and installation confidence.

Complete Fire-Side Installation Confidence

Combining ASC Gruvlok and Reliable FlexHead improves job performance with:

- Lower labor costs
- Simplified inspection
- Reduced leak risk
- Better consistency across multi-floor projects
- Faster overhead assembly

Your Project. Our Support.

In the high-stakes world of fire protection, every component of the system must be the best it can be. Lives depend on it. Ferguson connects contractors with the right products, technical guidance, and local expertise to keep fire-protection projects moving.

We bring together national inventory, Fire & Fabrication specialists, and trusted multi-brand solutions to help you install with confidence from riser to head. With more options and more information, we can develop fire protection systems that are optimized down to the last coupling.

SPF Anvil Grooved Components

FlexHead Flexible Sprinkler Drops

Afcon® Seismic Bracing

 **ASK YOUR FERGUSON FIRE & FABRICATION SPECIALIST ABOUT USING ASC SPF ANVIL FITTINGS AND FLEXHEAD PRODUCTS ON YOUR NEXT PROJECT.**

SPF Anvil Grooved Components for a Faster, Safer Install

ASC's Gruvlok® system provides fire contractors with proven, UL/FM-approved grooved fittings engineered to speed installation and reduce hot-work requirements.

Features and Benefits

- UL/FM-approved (where applicable)
- Faster installation than welded systems
- Ideal for TI work, risers, and overhead retrofits
- Consistent fit for efficient inspections
- Backed by ASC engineering and Ferguson support

Reliable Fire Components for Versatility and Continuity

Reliable provides sprinkler heads, control valves, trim, and accessory components used across all applications of fire protection systems.

Features and Benefits

- Complements ASC fire offerings
- Used alongside SPF Anvil grooved fittings and FlexHead flexible drops
- Ensures full-system compatibility through Ferguson

Afcon Seismic Bracing

Afcon seismic bracing supports fire protection systems with UL/FM approved seismic solutions.

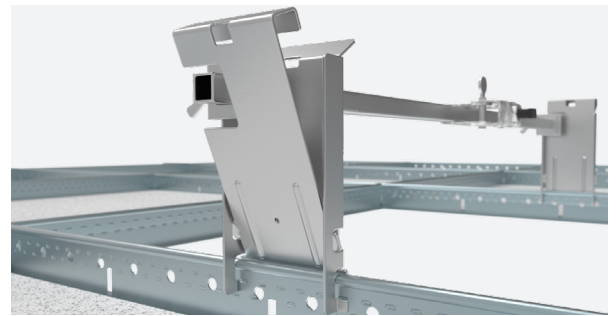

- Fast-install seismic bracing for fire systems
- Major differentiator for ASC's fire package
- Compatible with SPF Anvil grooved systems and FlexHead drops

FlexHead Flexible Sprinkler Drops: Installation Confidence You Can See

FlexHead flexible assemblies deliver cleaner, faster, and more consistent sprinkler installations with fewer points of failure compared to competitive 3-piece hoses.

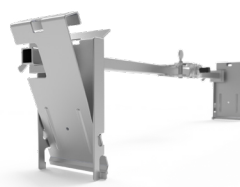

Features and Benefits

- Faster install vs. 3-piece competitive hoses
- No disassembly = fewer installation errors
- Fewer leak paths reduces callbacks and jobsite risk

FlexHead Fully-Welded Hose*

- Fully-welded one-piece hose installs directly out of the box with no field disassembly required
- Factory-assembled, 100% leak-tested
- Box-to-branch-line installation in one step

FlexHead Bracket

- Snap-to-Connect legs—no screws or drill bits needed
- Installs right from the box
- Faster overhead assembly than competitive brackets

FlexHead UltraFlex Hose

- Modular assembly options include straight drops, elbows, grooved or threaded inlets
- 100% factory leak-tested

**Optional pre-installed sprinkler heads via Ferguson*
