

EXPANDED OFFERING

# INSTALL MECHANICAL ROOM SYSTEMS FASTER

A Ferguson-integrated grooved mechanical-room solution built around ASC's Gruvlok® system

## ASC Gruvlok® Grooved System Components for Complete Mechanical-Room Builds

Ferguson integrates together ASC's Gruvlok grooved system - including the Fig. 74-CL coupling - along with coordinated valves, equipment connections, and supporting mechanical-room components to give contractors a complete, job-ready system engineered for speed, consistency, and installation confidence.

### Complete Mechanical-Room Installation Confidence

Combining ASC's Gruvlok® grooved system with coordinated mechanical-room components improves job performance with:

- Faster mechanical-room assembly
- Easier equipment alignment
- Better consistency across multi-trade projects
- Reduced rework and leak risk
- Simplified inspection and commissioning

CONNECT WITH YOUR FERGUSON REPRESENTATIVE TO LEARN HOW THE FIG. 74-CL COUPLING AND ASC GRUVLOK SYSTEM CAN SUPPORT YOUR NEXT MECHANICAL-ROOM PROJECT.

## ASC Gruvlok®: The Core of the Grooved System

Grooved fittings engineered to speed installation, reduce alignment issues, and support consistent mechanical-room builds - including the Fig. 74-CL coupling designed for reliable, high-performance connections.

### Features and Benefits

- UL/FM-approved (where applicable)
- Faster installation than welded systems
- Ideal for TI work, risers, and overhead retrofits
- Consistent fit for efficient inspections
- Backed by ASC engineering and Ferguson support
- Designed for performance in demanding commercial mechanical environments

## Where the Gruvlok® System Connects in the Mechanical Room

### Grooved-End Valves & Controls

Isolation and control components designed to integrate seamlessly into grooved piping systems without slowing installation.

### Mechanical Equipment Connections

Grooved connections for pumps, boilers, water heaters, and other mechanical equipment that simplify tie-ins and improve serviceability.

### Supports, Seismic & Installation Accessories

System-compatible supports, bracing, drains, vents, and accessories that complete the mechanical-room installation and support inspection readiness.

### Your Project. Our Support.

In complex mechanical rooms, every connection matters. Ferguson brings together grooved system expertise, coordinated system planning, and local support to help contractors install with confidence from first connection to final inspection. With more options and more system knowledge, we help mechanical teams build mechanical rooms optimized down to the last connection.
